

POWER & CHARGING

IN DESK POWER MODULES

In desk and under desk power units provide an organised and efficient power source, minimising loose cables and making for organised power distribution to the user.

IN DESK POWER MODULES

Available as 13A three pin socket only or in combination with USB A and C smart charge and power outlets, these units fit neatly into a standard 80mm cable port desktop cut-out. Fitted with a spare 13A fuse and integral blue LED lighting indicating power to the unit, these are a neat addition to any desk.

UNDER DESK POWER

Extension Blocks, Power and Connector Leads are a convenient method of neatly bring power to the desk for distribution to monitors, laptops and other on desk equipment. Extension Blocks are available with 4 outlets and compatible Connector Leads in a number of lengths. Power Cables are the safest way to bring electrical power to the desk, avoiding a profusion of trailing cables.
